QIUYING LI

School of Electronic Engineering and Computer Science, Queen Mary University of London, UK

Email: qiuying.li@qmul.ac.uk

RESEARCH PROFILE

Researcher with a strong background in optimization-driven scheduling and resource-constrained decision-making. My research focuses on dynamic and robust scheduling using evolutionary and metaheuristic algorithms. I am currently extending these methodologies toward system-level resource orchestration in distributed and heterogeneous computing environments, with emerging research interests in collaborative AI inference and edge–cloud systems.

EDUCATION

PhD Student | School of Electronic Engineering and Computer Science **|** Queen Mary University of London, UK **| Sep 2026 – Present**

- Supervisor: Ahmed M. A. Sayed
- Funding: China Scholarship Council (CSC)–QMUL Joint Scholarship Programme
- **Core Research:** Robust scheduling and optimization under dynamic system constraints, with applications to large-scale distributed and heterogeneous systems. Resource-Efficient Distributed LLM Inference in Networked-AI Systems.

M.Sc. in Systems Engineering | Shanghai University, China | Sep 2023 – Apri 2026

- GPA: 3.8 / 4.0 | Supervisor: Prof. Quanke Pan
- **Core Research**: Robust scheduling and optimization under dynamic system constraints, with applications to large-scale distributed and heterogeneous systems.

Visiting M.Sc. Student | Institute of Artificial Intelligence, De Montfort University, UK | Dec 2024 – Mar 2025

- Supervisor: Prof. Shengxiang Yang (IEEE Fellow)
- Focus: Many-objective evolutionary optimization for large-scale and non-stationary system scheduling problems.

B.Eng. in Software Engineering | Liaocheng University, China | Sep 2019 – Jun 2023

- GPA: 4.14 / 5.0 (**Top 1%**)
- Thesis: Distributed Permutation Flowshop Scheduling

SELECTED PUBLICATIONS

1. **Q. -Y. Li**, Q. -K. Pan, L. Wang, L. Gao and W. -M. Li.
   Dynamic Cascaded Flow-Shop Scheduling Using an Evolutionary Greedy Algorithm.
   IEEE Transactions on Evolutionary Computation, 2025. doi: 10.1109/TEVC.2025.3541959.
2. **Q. Li,** Q. Pan, L. Gao, W. Li, and S. Yang.
   Scenario-to-objective transformation for robust cascaded flow-shop joint scheduling: a many-objective optimization framework.
   Expert Systems with Applications, 2025. doi: 10.1016/j.eswa.2025.130725.

3. **Q.-Y. Li**, Q.-K. Pan, H.-Y. Sang, X.-L. Jing, J. M. Framiñán, and W.-M. Li.
   Self-Adaptive Population-Based Iterated Greedy Algorithm for Distributed Permutation Flowshop Scheduling Problem with Part of Jobs Subject to a Common Deadline Constraint.
   Expert Systems with Applications, 2024. doi: 10.1016/j.eswa.2024.123278.
4. **Q.-Y. Li**, Q.-K. Pan, L. Gao, H.-Y. Sang, X.-X. Zhang, and W.-M. Li.
   The Constrained Permutation Flowshop Problem: An Effective Two-Stage Iterated Greedy Algorithm to Minimize Weighted Tardiness.
   Swarm and Evolutionary Computation, 2024. doi: 10.1016/j.swevo.2024.101696.

TECHNICAL SKILLS

- **Optimization & Scheduling:** Evolutionary Algorithms, Metaheuristics, Multi-objective Optimization.
- **Programming:** C++, Python, C#, Java.

AWARDS & SCHOLARSHIPS

- CSC–QMUL Joint Scholarship Programme, 2026–Present
- **National Scholarship** (China MoE): 2024, 2025 (Top 0.2% nationwide)
- Outstanding Thesis Cultivation Fund: 2025
- First-class Postgraduate Academic Scholarship: 2023–2025 (3 consecutive years)
- Outstanding Undergraduate Thesis Award: 2023
